STRATEGY 2 ››
CARPARKS ON THE EDGE OF THE CBD

SHADED CARPARKS

SHUTTLE BUS SERVICE

WELL-LIT CARPARK & PATHWAYS

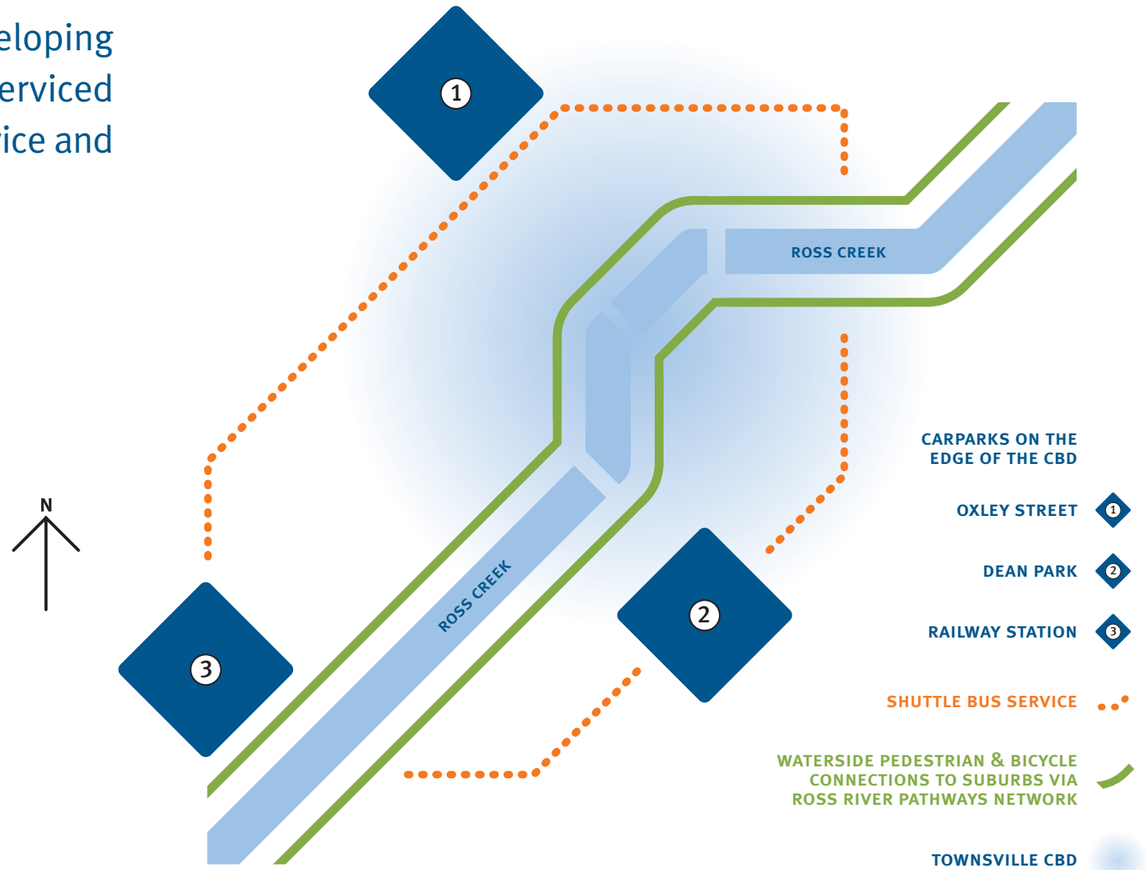
Council is exploring the viability of developing new carparks on the edge of the CBD, serviced by a Council-subsidised shuttle bus service and better pedestrian links.

Carparks
Carparks located on the outskirts of the CBD will be used by people working in the city and will free up carparks in the CBD for inner city shoppers. For example, Oxley Street ①, Dean Park ② and the Railway Station ③ could provide secure and shaded carparks at an affordable price.

Shuttle bus
Shuttle buses that circuit the CBD will be provided from carparks on the edge of the city.

Better pedestrian links
Pedestrian paths will be linked to the carparks and provide convenient, shaded and safe access to the CBD.

On-site parking
On-site parking will be provided in new developments.



STRATEGY 3 ››
BETTER FORECASTING

Townsville City Council is co-funding a new project to develop a travel forecasting model that will aid in ››

- **›› Identifying parking demand and supply**
- **›› Planning for future carparking requirements**
- **›› Monitoring the effectiveness of carparking strategies and policies**
