

## COUNCIL PROGRESS

## TOWNSVILLE CBD REVITALISATION

CBD MASTERPLAN

Townsville City Council has already >>

- >> Increased on-street parking in the centre of city streets
- >> Converted 300 metered parking lots into free short-term parking
- >> Worked with the private sector to provide carparks in new developments
- >> Approved a substantial number of new private carparks
- >> Published a brochure with the location of all carparks currently in the CBD
- >> Council acknowledges the need to build more carparks in the future. This strategy is designed to address the demand for carparks and determine the best location for them in our changing city

The carparking strategy links with the new City Plan and the CBD Masterplan, which are guiding the development of Townsville's CBD Revitalisation. In particular, they address the need to >>

- >> Correct urban decay in the Townsville inner city
- >> Revitalise Townsville inner city as the hub of the region
- >> Create a platform for regional, national and international business opportunities
- >> Create contemporary lifestyles for the Townsville and tourist communities
- >> Promote cultural and social amenity
- >> Protect the heritage values of the Townsville inner city

## Have your say >>

In line with Townsville City Council's ongoing commitment to consult with the community we would welcome your comments regarding the carparking strategy.

We will keep residents and local businesses up to date regularly with our progress.
