

CBD UTILITIES UPGRADE

Townsville City Council investment is improving water and waste water infrastructure in our CBD for the future development of our city.

THE STRAND:

Sewer and water main installation along The Strand is within a month of completion, with work moving through the Oxley Street roundabout and towards the final stage of work in Leichhardt Street in the next fortnight. The traffic control equipment near Mariners Drive intersection will be removed this weekend. A traffic detour will be in place for several more weeks. Access to the ferry terminal and the Entertainment Centre is open.

FOOTPATH WORKS:

Crews will be working on Flinders Street East drilling and installing water pipes next week. Property access will be retained during this work, with short term unavailability of some car parking bays.

STANLEY STREET:

Water pipe installation work will continue, with work near properties adjacent to Victoria Street. Changed traffic conditions are in place between Hales Street and Gregory Street. Local resident property access will be maintained.

STURT STREET:

Water pipe installation work continues at several locations on Sturt Street. In the next fortnight work will occur between Knapp and Morris Street, including across both Knapp and Morris Street intersection. Changed traffic and pedestrian conditions will be in place, drive with care.
