## TRADE WASTE SEWER ADMISSION LIMITS

Water Supply (Safety and Reliability) Act 2008
Trade Waste Management Plan 2019

These sewer admission limits describe the maximum level of contaminants (concentration and/or mass based) allowable in trade waste discharged to council's sewerage system. No person shall discharge trade waste into council's sewerage infrastructure if any substance exceeds the sewer admission limits, unless otherwise approved as a specific trade waste approval condition.

Where the sewer admission limits are silent for any particular contaminant, the discharge must not contain any detectable level of that contaminant. For more detail, refer to the Trade Waste Management Plan 2019.
