

Works Notification

Wulguru Wastewater Infrastructure Resilience Program – Project Update

Thursday 11 June 2026

What works are coming up?

Stage 1 works on Wright Street are nearing completion, with works expected to finish by the end of June 2026. Council thanks residents and businesses for their patience.

Stage 2 will begin in mid-June 2026, continuing the diversion sewer from Cluden Park to Wright Street, with initial site setup, environmental controls, and traffic management in place.

When will the works take place?

Location	Cluden Park, Stuart Drive and Wright Street, Cluden
Timing	Stage 2 is scheduled to commence from mid-June 2026 (following Stage 1 completion) and is expected to take five (5) months to complete, weather permitting.
Hours	Regular work hours are from 6am to 6pm Monday to Saturday . In exceptional cases, work may be required outside these hours.

What will the works include?

As part of **Stage 2**, Council will:

- complete site establishment, environmental controls and traffic management
- undertake open-trench excavation within Cluden Park
- undertake vegetation management within the private Cluden Park boundary in coordination with the landowner (Townsville Turf Club), including the removal of 39 trees and planting of native species

- install sewer infrastructure, including a trenchless micro-tunnel beneath Stuart Drive
- finalise connections and tie-in works at Wright Street.

What does this mean for me?

If you live near or are travelling through the area, you may experience:

- construction machinery and increased vehicle movement within Cluden Park
- higher levels of dust, noise, and vibration
- localised traffic management during works, particularly near Stuart Drive and Wright Street
- a temporary full closure of Wright Street for approximately four weeks in late August/September 2026 to allow final connections and road reinstatement.

Funding

Stage 2 of this project is funded by Townsville City Council.
