

Works Notification

Wulguru Wastewater Infrastructure Resilience Program – Stage 1

Tuesday, 17 March 2026

What works are coming up?

Townsville City Council is preparing to begin construction of a new, larger diameter sewer pipe on Wright Street, to redirect wastewater from Glenlyon Drive, Powell and Neelsen Streets in Wulguru.

This will increase capacity of the network, reducing both the volume and frequency of wastewater overflows during wet weather events.

When will the works take place?

Location	Wright Street, Wulguru
Timing	From Monday 23 March 2026 , Council expects the project to take three (3) months to complete, weather and project conditions permitting.
Hours	Normal work hours are from 7am to 6pm Monday to Friday . In exceptional cases, work may be required outside these hours.

What will the works include?

As part of the works, Council will:

- install a new underground sewer line
- conduct testing operations and complete site remediations.

What does this mean for me?

If you live in or are travelling through the area, you may experience:

- construction machinery and increased vehicle movement
- higher levels of dust, noise, and vibrations
- temporary traffic changes, including lane closures, reduced speed limits, minor delays, public transport access and on-street parking closures
- Council will notify impacted properties at least seven days before work begins.

Funding

Project funded by Townsville City Council and the State Government’s Works for Queensland program and delivered by local contractors KB Pipelines.
