

Council Works Notification

Rock Stabilisation Works

Works location: Sturt Street Cutting, Townsville City

Flyer delivery date: Tuesday 4 July 2023

Townsville City Council is committed to providing and maintaining over \$5.4B worth of community assets consisting of water and wastewater networks, bridges, drainage, roads, waste management, community facilities, sporting venues and more throughout our city. Through this commitment Council is conducting the following **Sturt Street Cutting** works:

Works will involve the installation of netting, rock bolts and shotcrete. The rock bolts will be installed at specific locations utilising mobile drilling rigs. Netting and shotcrete in selected locations will be utilised in combination with the rock bolts to form a new stabilised rock face.

The aim is to provide a sustainable protection barrier to the rock face that will significantly reduce the impact of future weather events to the cutting and the users of the cutting carpark.

As part of this project, a closure of the city Inbound Lane will be in place along Sturt Street between the street boundaries of Fletcher Street to Blackwood Street. All inbound traffic will be shifted to the outbound lane, turning this dual lane into a two directional road throughout works. Road users are requested to adhere to all signage during the period works are occurring.

The **Sturt Street Cutting Stabilisation** works including change of traffic conditions are scheduled to commence on **Tuesday 11 July 2023** with expected completion in **September 2023** (weather and project conditions permitting).

Council advises that the Sturt Street Cutting public car park will be closed throughout works with **temporary free parking available within an allocated lot on Wally Tallis Way**, adjacent Queensland Country Bank Stadium as highlighted overleaf.

Works will involve:

- Traffic control and temporary lane closure
- Closure of the Sturt Street Cutting car park
- Operation of machinery throughout the work zone
- Installation of safety fencing
- Noise, dust, vibrations, and flashing lights

Council will maintain access for residents and businesses within this section of Sturt Street impacted via the required temporary lane closure.

Normal work hours are **6am to 6pm Monday to Saturday**. In exceptional cases, work may be required outside these hours.

Council has appointed a local contractor to undertake these works.
