

Council Works Notification

Water Main Construction Works

Work location: Ross River, Douglas, and Condon

Flyer delivery date: Tuesday, 24 August 2021

Townsville City Council is committed to providing and maintaining \$5.4B worth of community assets consisting of water and wastewater networks, bridges, drainage, roads, waste management, community facilities, sporting venues and more throughout our city.

Townsville's water network consists of reticulation pipelines, pump stations and major trunk lines that work together to perform an essential infrastructure process that ensures all properties, commercial and industrial businesses receive efficient operational water service.

The project will deliver an essential underground Water Main pipeline that will secure the water connection between the suburban catchment zones of Douglas through to Condon. This new water pipe connection will replace the existing connection that was damaged during the 2019 weather event.

Works will involve the installation of a new water main pipe constructed under the Ross River between the street boundaries of Riverway Drive and Freshwater Drive that will be conducted by under boring and drilling into the existing earth to create a passage for the installation of the water pipe.

The **Ross River** water main project is scheduled to commence **Wednesday, 11 August 2021** and is expected to take **sixteen (16) weeks** to complete (weather and conditions permitting).

Works may involve:

- Excavation and machinery operations
- Safety fencing installed for pedestrian
- Noise, flashing lights, ground vibrations and dust

Please note due to the nature of these works there is the requirement for the under boring and drilling works to be operational seven days per week.

Council has appointed a qualified contractor to conduct these works.

Normal work hours are **7am to 6pm Monday to Friday, 7am to 6pm on Saturday, and 9am to 5pm on Sunday**. In exceptional cases, work may be required outside these hours.
