## Appendix A Notification and Communication Lists

A1 Internal Notification List
A2 External Notification List
A3 Downstream Residents Notification
A4 Emergency Alert Polygons

Appendix A1 and Appendix A2 have been redacted Townsville City Council

## Appendix A3: Downstream Residents Notification

## Notification

The LDMG on behalf of TCC will warn Downstream (D/S) residents who may be harmed or whose property may be harmed by a dam hazard as per the communication instructions in Sections 5 to 11 in accordance with the Emergency Alert Polygon in Appendix A5.

Refer to Townsville City Council Community Information and Warnings Sub Plan
https://www.townsville.qld.gov.au/community-support/community-safety/disaster-management/

## Zones

TCC/LDMG will warn D/S residents in accordance with the zones identified in the inundation zoning maps in Appendix B.

## Priority

TCC will prioritise warnings to D/S residents in accordance with emergency alert protocols.

## Appendix A5: Dam Failure Emergency Alert Request

## Queensland Emergency Alert Request Guidelines

The LDMG is responsible to send out Dam Failure Emergency Alert Requests.
In the event that communications are lost with the LDMG, IC and DSTDM, the DDO would be required to carry out the following:

An Emergency Alert Request form should be completed, if required (see Sections 5 to 11 for actions), and sent to the SDCC Watch Desk in order to activate the Ross River Dam Emergency Polygon/s.

## Instructions:

- This form is not to be used UNLESS an incident has triggered an emergency event, and all external communication has been lost.
- Print off the following Queensland Emergency Alert Request form.
- Telephone the SDCC Watch Desk on $\square$ and tell them your intention to use the Emergency Alert for a dam failure for Ross River Dam.
- Polygons for this dam is stored in the Disaster Management Portal in the Emergency Alert Area. Request the SDCC operative to locate the polygon:
- Give them your phone number, confirm their name, and end the call after advising the form will be sent shortly.
- Fill in the form and send to SDCC watch desk email:
- Phone back to check the message has been sent and ask for an email to confirm.
- Send an internal Incident Alert to advise of completion.
- Use the following messaging text to complete the emergency alert request (next page):

Table A1: Emergency Alert Messaging - Ross River Flood, Dam Failure and water contamination

## DO NOT SEND THIS PAGE

## GUIDE TO COMPLETE STEPS 1-4

EA Polygon Area (e.g. detailed description and location reference to allow positive identification of message area, including street names with cross street, areas of interest such as parks, rivers, dams, coastal areas) it is preferable to attach a map identifying the message area. If a Threat Direction has been requested, please clearly indicate it on the map.

STEP 2. Tick applicable box and note the file name.
Voice Message: type or handwritten the required message. As the message will be translated by a text-to-speech process it is important that words are not unintelligible when translated e.g. "qid" used in a web site address must be entered as "q I d", similarly the word "dot" must be entered into
STEP 3. a web address instead of a full stop.
Voice Message ideally should have no more than 450 characters including spaces. Do not use special characters - refer to EA Manual for details. Warning message must start with "Emergency Emergency"

STEP 4.
SMS is restricted to a maximum of 160 characters including spaces and punctuation. Either type the message or handwrite the characters into the boxes.

Example: SMS Flash Flood Warning from SES for Opal Valley-immediote threot to Iffe/property-Warn others-leave area/prepare NOW or seek higher ground-Listen to locol radio

If using template EA messages, please provide the appropriate variables that are in the template message guides. Refer to the Queensland Emergency Alert Manual for copies of the template message guides.
