

Self-Assessment

Name: Date:

Complete the following questions about your experience learning about the Network and building weather stations.

Answer the questions to let your teacher know how you felt about today's lesson.

Which components of the weather station were the most challenging to put together?

Why?

Which componets were easier to understand and put together? Why?

How do you think the weather station will hold up against the natural environment's conditions?

What network will your weather station connect to?

How will your weather station connect to others to build a network and transmit data?
