Flyer delivery date: Tuesday, 28 September 2021

Townsville City Council is committed to providing and maintaining over \$5.4B worth of community assets consisting of water and wastewater networks, bridges, drainage, roads, waste management, community facilities, sporting venues and more throughout our city. Through this commitment Council has appointed local contractor Newlands Civil Construction to conduct the following important works:

Wulguru Diversion Gravity Sewer and Rising Main Installation Works

Townsville's water and waste network consist of reticulation pipelines, pump stations and major trunk line that work together to perform an essential infrastructure process that ensures all properties, commercial and industrial businesses receive efficient operational water and waste service.

Newlands Civil Construction advises that the construction works are expected to commence in late October 2021 and are anticipated to be completed in late July 2022.

The resultant aim is to significantly reduce the pressure experienced by the wastewater system during the wet season and cater for the population growth of the southern parts of our city.

Prior to the main construction works commencing there is the requirement to conduct hydro excavations and underground service locating along the aligned pipe installation path with these works commencing **Tuesday, 5 October 2021**.

Newlands advises that due to the nature and size of this project some sections will not commence construction works until 2022. Please refer to overleaf regarding anticipated construction times within your area (please note that these times are an estimate and are subject to change due to weather and other project delays).

Further information will be provided prior to construction works commencing. Please do not hesitate to contact Newlands Community Engagement Officer on 4426 7740 if you have any questions and or concerns

Townsville City Council in partnership with Newlands Civil Construction thank you for your patience and understanding whilst these important works are being undertaken.
