

Works Notification

UPDATE: Winifred Street Stormwater Drainage Upgrade

Monday, 20 October 2025

What works are coming up?

Council is continuing flooding and drainage improvement upgrades along Winifred Street. With the first stage of the intersection work now complete, the project is progressing to the second stage: preliminary preloading works along the Ross River riverbank.

This project is part of Council's stormwater Capital Works program, designed to address and improve drainage across Council's networks, and raise the quality of life for residents.

When will the works take place?

Location	Winifred Street, Mundingburra
Timing	On Monday, 3 November 2025 and are expected to take two (2) months to complete, weather and project conditions permitting.
Hours	Normal work hours are from 6am to 6pm Monday to Saturday . In exceptional cases, work may be required outside these hours.

What will the works include?

As part of this project, Council will:

- establish a temporary path connecting Winifred Street to the Ross River to maintain pedestrian access
- establish a temporary track for construction vehicles
- remove approved trees and vegetation to enable construction access

- reinstate temporary vegetation upon completion of preloading activities in preparation for the final stage of the project
- undertake permanent vegetation replacement upon construction completion.

What does this mean for me?

If you live in or are travelling through the area, you may experience:

- diversion of shared path around the construction site
- construction machinery and vehicle movement
- increased levels of dust, noise, and vibrations
- temporary traffic changes, including road closures, detours, minor traffic delays and reduced speed limits
- on-site monitoring by Council's Principal Arborist to manage environmental impacts and ensure vegetation removal remains minimal.

Funding

Project funded by Townsville City Council.
