

## Townsville Laboratory Services Pools and Spas

Townsville Laboratory Services provides analytical services to pool operators, in accordance with Queensland Government guidelines, for the management and safe operation of swimming pools and spas.

Routine analysis is especially important for pools with high visitation numbers, particularly in summer months. Continued monitoring of pool water quality is also important in determining the effectiveness of a disinfection program.

Good management of swimming pools and spas ensures that patrons are not subject to health risks and is applicable to both private and public operators.

### Pool water testing

Townsville Laboratory Services offers pool water testing for:

- *E. coli*
- *Pseudomonas aeruginosa*
- Heterotrophic plate count
- Disinfection levels
- Corrosiveness of pool water
- Analysis of suspected contaminants

### Analytical services

Townsville Laboratory Services takes pride in providing fast and accurate analysis at competitive prices. Sample collection training can also be arranged for clients if required.
